---

## Professional Summary

Software Developer (Python | JavaScript | Django | React) with strong project-based experience building scalable web applications and RESTful APIs. Completed Meta Back-End Developer Certification with hands-on experience in back-end frameworks, databases, and version control. Passionate about clean code, open-source, and eager to contribute to real-world projects — open to unpaid internships or volunteer roles.

---

## Technical Skills

Languages & Frameworks: Python, Django, Flask, JavaScript, react.

Tools & Platforms: Git, GitHub, MySQL, Visual Studio Code.

Skills: REST APIs, Authentication, Debugging, Deployment, Version Control, Problem Solving.

---

## Experience

### Frontend Developer Intern – Obtibri Ltd (2023–2024)

- Contributed to web UI development using HTML and CSS.
- Used Git for version control and collaborated in a small dev team.
- Assisted in debugging and DevOps learning initiatives.
- Gained practical experience in Agile teamwork and basic cloud tools.

### Student Ambassador – Cowrywise (2024 – Present)

- Promoted financial literacy to students via workshops and peer engagement.
- Coordinated financial planning sessions and awareness campaigns.
- Collaborated with Cowrywise to enhance student outreach strategies.

---

## Selected Projects

### OpenSpace – Discussion Forum (April 2024)

- Full-stack discussion platform built with Django, MySQL, and Bootstrap.
- Implemented user authentication, thread creation, comment section, and profile management.
- Developed responsive UI and deployed to production. [Repository](#)

### To-Do List App (May 2024)

- Built using Django back end with a responsive front end for managing daily tasks.
- Implemented task creation, editing, priority flags, and persistence using database. [Repository](#)

### Little Lemon Food Store App (July 2024)

- Basic e-commerce food store created as part of Meta curriculum.
- Implemented item browsing and dynamic content management.
